**Saltwater-resistant for any weather.**

**Motion plastics products from igus® improve the technology and reduce the costs.**

Self-lubricating products from igus® are approved in many maritime applications, even under the toughest environment conditions. Seawater-resistant and rugged for shipbuilding in wind, rain or snow while remaining lightweight and functional in the boat interior.

e-chain systems® guide any cable reliably and safely during electrical movements. iglide® plain bearings and drylin® linear guides use dry operation and move sliding doors, hatches, steering systems, lift systems and all other rotating and swiveling components quietly and completely maintenance-free. Always 100% self-lubricating.

igus® products also appeal as visible parts thanks to their elegant design and availability in many finishes. igus® products have received the **IF product design award** year after year.

**Joseph Ciringione**

e-chain systems®

**Motion plastics – self-lubricating mobility for boats, yachts and ships.**

Either for prototype or production, single component or ready-to-install systems such as linear modules with motor ... **all igus® products offer you the motion plastics advantages:**

- Self-lubricating for life
- Corrosion-resistant
- Smooth and silent
- Easy, straightforward assembly
- Large variety, extensive standard product range
- Customized solutions from prototype to production

Our online tools also enable you to reduce process costs. igus® shipped from stock in 24-48 hours! Also visit our industry website.

# improve technology ...

in sailboats ...

in yachts ...

or motorboats ...

with motion plastics from igus®

## Reduce costs, improve technology – such as in ...

### Self-tacking jib

#### drylin® curved profile guides

Individually curved drylin® linear guides for self-tacking jib.

### Roller reefing (jib furler/spinnaker pole)

#### igubal® spherical bearings

Spherical igubal® bearings compensate for angle and tolerance errors in roller reefing (jib furler/spinnaker pole).

### Bow thruster

#### iglide® PRT slewing ring bearing

Self-lubricating iglide® PRT slewing ring bearings for bow thrusters.

### Carriage systems

#### drylin® W profile guide

Corrosion-resistant drylin® W profile guides made from 316 (VA) stainless steel for carriage systems.

### Bilge pump

#### iglide® plastic plain bearings

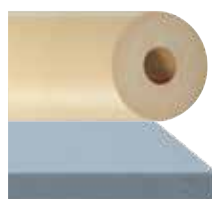

Durable, self-lubricating iglide® plain bearings in a bilge pump.

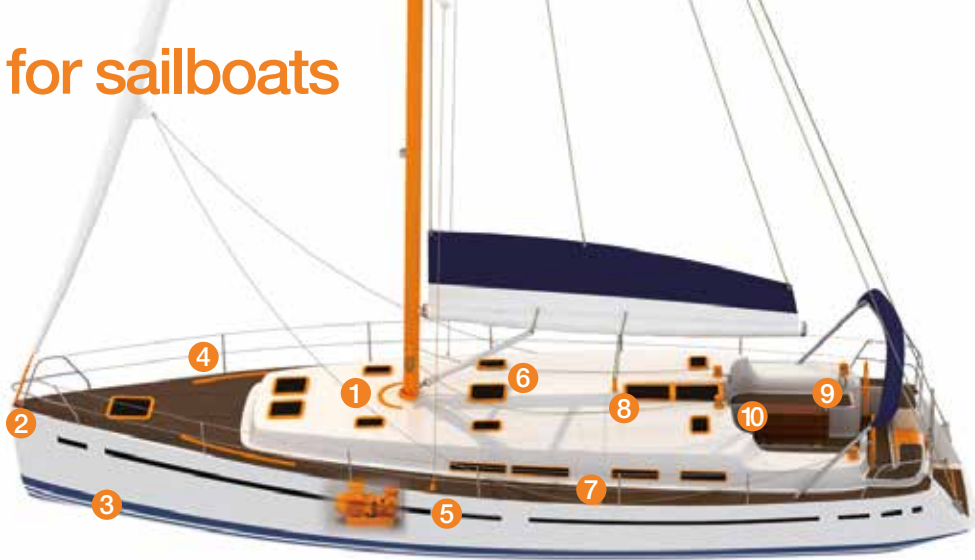

### Kicking strap

#### iglide® bar stock

Self-lubricating customized geometry made from iglide® bar stocks for kicking straps.

# for sailboats

## Jam cleats

### iglide® plastic plain bearings

Maintenance-free iglide® plain bearings for high edge pressures in jam cleats.

## Steering systems

### iglide® J plastic plain bearings

iglide® J plain bearings for fast and slow movement in the steering gear.

## Plain bearing-mounted hatches

### drylin® WJRM hybrid bearing

Smooth drylin® hybrid bearings for hatch movements.

## Dodgers and bimini tops

### drylin® N low profile guide

drylin® N low profile guides for installation spaces of 9-12 mm for dodgers/bimini tops.

## Reduce costs, improve technology – such as in ...

### Powered sun roof (slider)

#### drylin® N low profile guide

Corrosion-resistant drylin® N flat guide for guiding powered sun roofs.

### Seating

#### iglide® G300 plastic plain bearings

Self-lubricating iglide® plastic plain bearings for seat kinematics.

### Windows

#### drylin® T low profile linear guide system

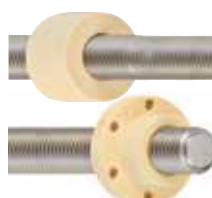

Compact drylin® T low profile linear guide system for window guide.

### Steps

#### dryspin® lead screw technology

Efficient and durable dryspin high helix threads for retractable steps.

# for yachts

## Ramps

**iglide® MCM plastic plain bearings**

Installed quickly: iglide® clip bearings for ramp movements.

## Anchor lockers and anchor winches

**iglide® Z plastic plain bearings**

For high edge pressures in anchor lockers and winches.

## Reduce costs, improve technology – such as in ...

### Steering system

#### igubal® spherical bearings

Self-lubricating, tolerance-compensating igubal® spherical bearings in steering systems.

### Gearboxes

#### igubal® coupling bars

Noise-reducing igubal® coupling links for gearboxes with variable bearing distances.

### Spring-mounted seating systems

#### drylin® W profile guide, E2 micro e-chain®

Electrical seat adjustment with drylin® W profile guide and E2 micro e-chain®.

### Valves (EGR and turbocharger)

#### iglide® plastic plain bearings

Oil and temperature-resistant iglide® plain bearings for valves (EGR and turbocharger).

### Flap mounting of intake manifolds

#### iglide® plastic plain bearings

Pressure-resistant iglide® plain bearings in flap mounting of intake manifolds.

### Gear actuators

#### iglide® plastic plain bearings

Medium-resistant and shock-absorbing iglide® plain bearings for gear actuators.

# for motor boats

## Belt tensioner

**iglide® plastic plain bearings**

Vibration-dampening iglide® plain bearings for belt tensioners.

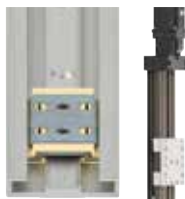

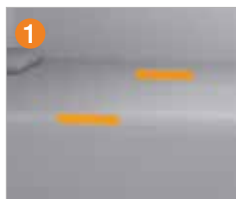

## Trim tabs

**iglide® plastic bearings, drylin® QLA linear drive**

Self-lubricating and pressure-resistant iglide® plain bearings and telescopic drylin® QLA linear drive for trim tabs.

## Reduce costs, improve technology – such as in ...

### Beds

**drylin® N flat guides, drylin® SLW with motor**

drylin® N low-profile rail for manual bed retraction,  
drylin® SLW linear module for electrical retraction.

### Chairs and tables

**e-chains® ZF**

Reliable electrical seat adjustment with e-chain® ZF.

### Windows

**drylin® T low profile linear guide system**

Compact drylin® T low profile linear guide system  
for window adjustment.

### Wash basins

**e-chains®**

Electrical height adjustment of wash basins with  
e-chain® E-Z chain®.

### Doors

**iglide® plastic plain bearings**

Shock-absorbing, durable, self-lubricating iglide®  
plain bearings for door hinges.

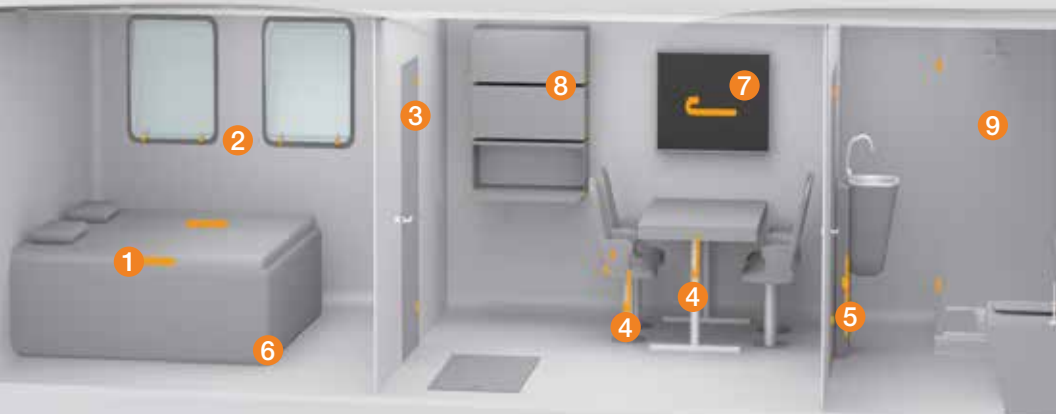

### Lift bed systems

**drylin® W profile guide**

drylin® W profile guides for guiding lift bed systems.

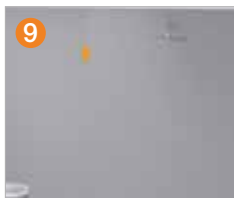

# for the interior ...

## TV lift systems

**drylin® SLW (also available with motor)**

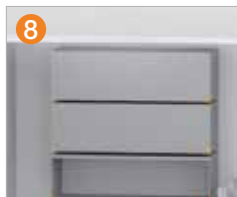

Monitor adjustment with a push of a button with drylin® linear axes and motor.

## Shower walls

**drylin® WJRM hybrid bearings**

Slide shower walls easily with drylin® W hybrid bearings with an integrated roller.

## Wardrobe doors and pull-outs

**iglide® plastic plain bearings**

Open or move wardrobe doors quietly with shock dampening using iglide® plain bearings.

# Maintenance-free even underwater

## iglide® plain bearings ... a selection of the 50 materials

**iglide® T500 –  
The high-tech problem  
solver**

- For operating temperatures of -148°F to +482°F in continuous operation
- Excellent chemical resistance
- High compressive strength
- Very low moisture absorption
- Excellent wear-resistance through the entire temperature range

**iglide® G300 –  
The general purpose  
bearing**

- Maintenance-free dry operation
- High abrasion resistance
- Resistance to dust and dirt
- More than 650 sizes

**iglide® P –  
low-cost and  
maintenance-free**

- Low water absorption
- High load capacity
- Low-cost
- Low wear rates

**iglide® J200 –  
for anodized aluminum**

- Very long service life with hard anodized aluminum
- Low coefficients of friction
- Low wear
- For low to medium loads

**iglide® H2 –  
cost effective high-  
temperature bearing  
up to 392°F**

- Underwater use
- Low-cost
- Chemical-resistant
- For high temperatures

**iglide® J –  
the fast-and-slow-  
motion  
specialist**

- Low wear against different shaft materials
- Low friction coefficients in dry operation
- Vibration dampening
- High chemical resistance
- Best performance with soft shaft materials
- Low moisture absorption

# corrosion-free ... ready-to-install

## Self-lubricating and maintenance-free drylin® liners

Specially designed material combinations made from stainless steel and maintenance-free Tribo-plastics.

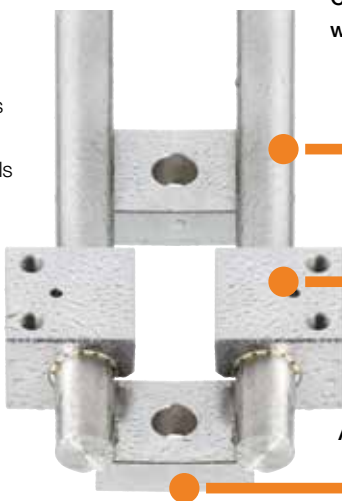

- All stainless steel components are 100% corrosion-resistant
- Use of 316 (1.4571) and 304 (1.4301) stainless steel
- Resistant against saltwater and harsh chemicals
- Ready-to-install solutions from stock
- Sliding elements made from iglide® J plastic plain bearings

### drylin® W stainless steel guide

Corrosion-resistant with the use of V4A (AISI 316Ti) and 1.4408 (AISI 316) stainless steel

100% self-lubricating due to tribo-plastics

Available as single and double rail

### drylin® SLW-ES lead screw module

The compact stainless steel variants of the lead screw linear modules are used in harsh environments.

### iglide® PRT slewing ring bearings

This PRT slewing ring bearing can be used up to +356°F and is resistant to chemicals and wear.

### drylin® R shaft guide

Corrosion-resistant linear adapters made from 303 stainless steel (1.4305). Dimension equal to ball bearings.

# Reliable and resistant ...

igus® motion plastics products are, for example:  
failsafe in shipyards ...

## Shipyard

Eight gantry cranes connected in series travel a total length of 590 ft. (180 m). Both the longitudinal and transverse travel are supplied by igus® e-chains® from the E4/4 range. The compact design of the e-chain® and guide trough allows the system to integrate seamlessly into the crane beam, leaving no cable loops hanging in the working area or field of view.

# also in maritime applications

... or on ships, such as:  
Anchor handling tugs

## Anchor handling and transport tugs with igus® e-chains®

Due to the special construction of the e-chains® from the 5050C series, with RBR (reverse bend radius), the A-Frame can pivot in the bow or stern direction.

The system was installed and commissioned in 2008 and continues to run flawlessly.

Visit our industry web pages for more information, products, application examples and useful online tools.

 [www.igus.com/boats](http://www.igus.com/boats)

Quickly find products online, configure them and calculate their service life.

With our igus® product finder, quickly find the right product and calculate the estimated service life of igus® products in your application.

 [www.igus.com/online](http://www.igus.com/online)

## For any task – in any quantity

Different industries need different solutions. No matter your industry igus® offers customized support for special applications. igus® has more than 50 years of experience and specialized resources in many industries.

 [www.igus.com/industries](http://www.igus.com/industries)

# fast and reliable.

## The igus® delivery service

More than 97% of components from the igus® catalog are available from stock.

- More than 100,000 products from stock
- No minimum order quantity
- No minimum order price
- No cutting charges for cables
- No packaging costs

## Modern and economic molding technology

igus® utilizes high tech, cost-effective solutions. Modern injection molding technology allows thousands of standard and countless custom components to be manufactured with high precision and quality.

## The igus® lab

The massive igus® lab (29,600 ft<sup>2</sup>) conducts more than two billion test cycles per year on more than 100 test rigs.

- Extensive test databases
- Customized tests on request

 [www.igus.com/test](http://www.igus.com/test)

## igus® motion plastics

One vision has been driving us for more than 50 years – motion plastics: innovative moving parts made of plastic that cost less and last longer. Our core technology consists of – high-performance plastics which have been optimized for friction and wear. This technology has made us into a world-wide leader for developing and manufacturing energy supply systems and plain bearings.
